

## Dryer lint combustion claims many thousands of homes and many lives to fire each year. Prevention is easy.

### *Air flow is the key...*

- Clean the lint screen after each dryer use.
- Wash the screen regularly in soapy water to remove film buildup from fabric softener use.
- Inspect the screen regularly and replace immediately if damaged to prevent lint from passing into the duct.
- Do not open the lint panel with the tumbler operating.
- Inspect the duct, dampers, and access covers quarterly. Clean and vacuum as needed.
- Beware vapors and substances that could ignite when heated including gasoline, dry cleaning solvents, cooking or machine oil, and wax.

Follow us...

**Fremont Insurance has been insuring and investing exclusively in Michigan since 1876.** By making this state our only place of business, we know the local geography, climate, demographics, and lifestyle in ways that national insurers can't.

Whether you're looking for home, auto, commercial, farm, or marine coverage, we can create a program tailored to your needs.

Ask your independent agent today to find out more about our exceptional pricing, dynamic products, and unparalleled service.

As your independent insurance agent, we're front and center for you.
